

BALANCED WEAVE BELT (SO,SR)

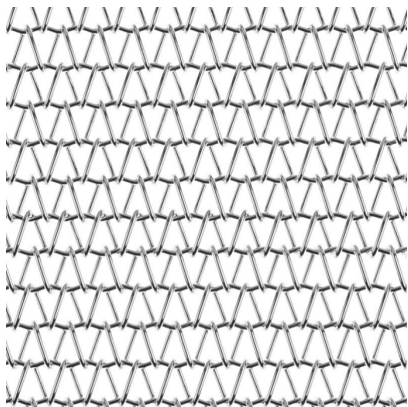

DESCRIPCIÓN DEL PRODUCTO

These metal belts are produced alternating right-hand and left-hand spirals joined by wavy or straight rods with welded endings.

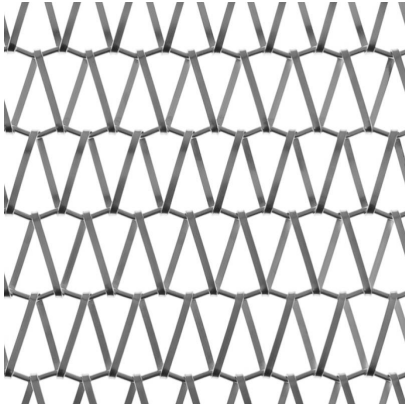

If needed, the spiral wire may also be laminated to achieve a flat surface and better product stability.

Main features:

- Great tracking and stability.
- Good flexibility properties.
- Flat surface.
- High temperature resistance.
- Excellent strength/weight ratio.
- Minimal maintenance.
